

Adrien Lachambre

Software Engineering Student | Web Development | Aspiring Cybersecurity Engineer

✉ adrien.lachambre@pm.me ☎ +33 6 20 29 27 48 / +82 010-9608-2802

📍 Nice, France / Seoul, South Korea

Summary

Software engineering student with strong foundations in web development (React, Vue, Next.js) and programming (C, C++, Python, JavaScript).
Currently studying at EPITECH and completing an exchange program at Inha University in South Korea.
Actively developing real-world projects, including a game development project using Godot with a commercialization objective, as well as a flashcard-based learning application (FlashCardStudy) designed to improve language learning efficiency.
Highly motivated to grow in the field of cybersecurity, with ongoing self-learning and a strong interest in building practical and technical expertise.

Skills

 Programming C C++ Python JavaScript PHP	 Web & Frontend React Vue.js Next.js	 Backend & APIs Symfony REST API OAuth2 Propel ORM
 Database SQL Database Design	 Tools & Platforms Git GitHub GitLab Vercel Supabase-Resend	 Other Godot AI tools

Experience

Apimo (Apiwork) Backend Developer Intern	Cannes, France April 2025 – July 2025
- Contributed to the rebuild of a large-scale REST API (Apimo API v2) using Symfony - Designed and implemented multiple API endpoints (GET, POST, PATCH, DELETE) for user and contact management - Refactored and improved existing endpoints to ensure consistency, scalability, and maintainability - Implemented business logic and validation rules within backend services - Worked with Propel ORM for database operations and complex query handling - Integrated security mechanisms including OAuth2 authentication and role-based access control - Participated in Agile development cycles (sprint planning, reviews, team collaboration) - Improved API architecture through modular design and reusable components	
Apimo (Apiwork) Backend Developer Intern	Cannes, France July 2023 – December 2023
- Contributed to backend development of a large-scale real estate software used by 5,000+ agencies - Worked within an Agile team using sprint-based workflows - Participated in the development and improvement of internal features and tools - Collaborated with experienced developers in a professional environment	

Languages

French Native	English Upper-intermediate (working proficiency)	Korean Beginner level (currently learning)

Education

Inha University

Computer Science / Software Engineering

Exchange program at Inha University, focusing on software engineering (Python, C, C++) and database design.

Gained experience in an international academic environment in South Korea.

<https://www.inha.ac.kr>

Exchange Program

Incheon, South Korea • 2025 – 2026

EPITECH – European Institute of Technology

Software engineering

Project-based curriculum focused on software development, problem-solving, and real-world applications.

Strong emphasis on autonomy, peer learning, and practical experience.

<https://www.epitech.eu>

Master's Degree (equivalent)

Paris, France • 2022 – 2027

Projects

FlashCardStudy

Development of a flashcard-based learning application focused on optimizing language acquisition and user engagement.

- Designed and developed a full-stack web application using modern technologies (React / Next.js)
- Implemented features for creating, managing, and reviewing flashcards
- Focused on user experience and learning optimization
- Integrated multi-language support and structured data management
- Continuously improving the application with new features and enhancements
- Deployed using Vercel and integrated backend services (Supabase, API integration)

<https://flashcardstudy.com>

2026 - Ongoing

LostHaven (Game Project)

Development of a single-player game using Godot as part of a team project, with a commercialization objective.

- Collaborating with a team on game design and development
- Implementing gameplay mechanics and core systems using Godot
- Developed gameplay systems and game logic using Godot scripting
- Participating in the full development cycle (design, development, testing)
- Contributing to a project with a real-world commercialization goal

<https://lost-haven.com>

2025 - Ongoing

Interests

 Learning Korean language and culture

 Traveling and discovering new cultures

 Outdoor activities and sports (swimming)

 Software development

 Cybersecurity
