PROFILE

Fifth-year Software Engineering student at EPITECH with professional experience in backend development and REST API design acquired at Apimo. I also build full-stack applications and projects integrating AI agents, tool calling and connections to MCP servers.

As a holder of France's National Student-Entrepreneur Status (SNEE), I am currently building Frameclue, a Creative Intelligence product focused on video creative analysis and planning new tests.

I am seeking a six-month, full-time final-year internship starting in early March 2027.

SKILLS

- Languages — Python · TypeScript · C++ · SQL · JavaScript
- Backend — FastAPI · REST API · OpenAPI · AsyncIO · Symfony
- Frontend — React · Next.js · Tailwind CSS
- AI — AI Agents · Tool Calling · MCP · Hermes (Nous Research) · Gemini · LLM Integration · RAG
- Infrastructure — Docker · Git · Linux · GitHub Actions · Vercel Workflow
- Data — PostgreSQL · SQLite · Supabase

EXPERIENCE

Apimo (Apiwork) — Backend Developer Intern (April 2025 – July 2025)

Cannes, France

- Rebuilt parts of a large-scale Symfony REST API and designed GET, POST, PATCH and DELETE endpoints.
- Implemented business logic, validation, Propel ORM queries, OAuth2 and role-based access control.
- Refactored services for consistency, scalability and maintainability within an Agile team.

Apimo (Apiwork) — Backend Developer Intern (July 2023 – December 2023)

Cannes, France

- Contributed to backend development for real-estate software used by more than 5,000 agencies.
- Improved internal features and tools within an Agile engineering team.

PROJECTS

Frameclue — Creative Intelligence platform (2026 – present)

Entrepreneurial product that analyzes video creatives with Gemini to produce evidence-grounded observations and recommend what to test next. Built the full-stack application, private uploads, structured versioned reports, authentication, RLS security and French/English interface.

Next.js · React · TypeScript · Supabase · PostgreSQL · Gemini · Vercel Workflow · Docker

Python Agent Runtime (2026)

Typed Python runtime for AI agents with tools, memory, streaming, Pydantic configuration and LLM adapters.

Python · Pydantic · OpenAI · RAG · CLI

Python RAG Framework (2026)

Lightweight RAG framework with ingestion, chunking, vector search, citations, history and SQLite persistence.

Python · SQLite · OpenAI · Anthropic · Vector Search

Python Doc Generator (2026)

CLI that analyzes Python repositories and drafts README, architecture, API and diagram documentation.

Python · AST · RAG · AI Agents · Markdown · CLI

FlashCardStudy — Language learning platform (2026)

Full-stack flashcard SaaS with authentication, spaced repetition, public sharing, Stripe billing and analytics.

React · TypeScript · Supabase · PostgreSQL · Stripe · Vercel

EDUCATION AND ENTREPRENEURSHIP

National Student-Entrepreneur Status (SNEE) — France

Developing Frameclue as an entrepreneurial project, from product design to technical architecture.

Inha University — Exchange program (2025 – 2026)

Incheon, South Korea

Computer Science and Software Engineering coursework in an international academic environment.

EPITECH — Software Engineering Expert, RNCP level 7 expected in 2027 (2022 – 2027)

Project-based curriculum focused on software development, autonomy and problem solving.

LANGUAGES

French — native · English — professional · Korean — beginner, preparing for TOPIK I
